

Cross Action Forks

***“For the ride
of your life”***

The best built forks just got better.

Now you can get heavy duty carbon steel forks with cross action on the 3 point pins with air shocks for load adjustment. This new patented design gives a soft ride, even on the roughest ground. This eliminates much of the bruising caused by transporting fruit and vegetables on 3 point forks.

This unique design keeps the forks the same distance from tractor, allowing greater lift capacity on small tractors and does not increase the bounce. The cross action also allows forks to self-level to uneven ground conditions for easier entrance into box or pallet.

This cross-action ride kit can also be adapted to existing forks for a soft ride on forks you already have.
